large10k, $T = 24$, MA57, free terminal SOC
100-step assessment; redundant-bound removal; iteration comparison only
Objective gap / NO tolerance
Original violation / NO tolerance
Dual residual / strict threshold
Penalty ρ
C4 baseline: rho0=48, balance=10; NO 168
Redundant-bound removal: fixed rho=48; NO not reached
Redundant-bound removal: rho0=32, balance=2; NO not reached
ADMM iteration; NO requires the first two panels at or below 1
